

# Heat Response Strategy

Actions for Clinician, Practice Leadership, and Management Roles

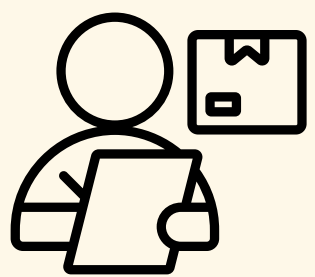

## Pre-Heat Season (Dec-May)

## Heat Season (Jun-Sep)

## Post-Heat Season (Oct-Nov)

### Managers

- Ensure Heat Guidance is distributed to all staff
- Convene pre-season rounds to review preparation and triage steps

- Reinforce Heat Guidance use during meetings
- Support teams in addressing operational or workflow issues

- Lead post-season debriefs
- Identify systems-level improvements for next season

### Practice and Clinical Leaders

- Identify and flag high-risk patients using the checklist
- Coordinate team plans for assessment and outreach

- Monitor for heat alerts
- Check in daily with teams

- Review team response and identify gaps
- Update workflows and planning for next season

### Clinical Staff and Physicians

- Review Heat Guidance
- Begin risk assessments and patient/family education

- Actively respond to heat-related risks
- Prioritize in-person outreach for high-risk patients

- Facilitate case reviews of successes and challenges with Heat Guidance
- Share feedback with leadership
